Did you know that 2021 is the smallest natural number that can be expressed as the product of two consecutive primes that produces a palindrome when multiplied by its reverse and that is a position in π, e and ϕ with the same digit?

$$2021 = 43 \times 47$$
$$2021 \times 1202 = 2429242$$
$$\pi_{2021} = e_{2021} = \phi_{2021} = 3$$
